Mr. Hussaini also expressed concerns regarding the number of parking spaces being requested by staff, and the feasibility of incorporating a temporary turnaround within the subject lands at the north end of the proposed public road.

Mr. Hussaini expressed concerns about the road network connections within the subject lands and between the subject lands and the lands to the north. Further, he advised that the proposed development does not include loading docks, and that the heritage home will remain in its current location and will be incorporated into the proposed development.

The Committee discussed the following relative to the preliminary report:

- Considering a temporary municipal easement permitting municipal vehicles to turn in the roundaboutThe future road network in the area and the

possibility of the applicant and the surrounding landowners entering a landowners' agreement to swap lands in order to preserve the integrity of the road network;

- Ensuring the industrial complex has appropriate lighting so that the lighting does not spill over onto the surrounding residential properties;
- The attractive design of the industrial building; and,
- The possibility of having layby parking on the future road extension to permit for additional parking.

Brian Lee, Director of Engineering, provided clarification on the potential layby parking on the road, advising that the future intersection would be with a Regional road and that the parking spaces would only be permitted within a certain distance from the intersection. He also noted that the parking spaces on a public road would be for public use not necessarily for the proposed development. Staff will discuss this parking alternative with York Region.
