This report provides an overview of the 2019 July year-to-date operating results comparing actual to budget and a forecast of the year-end results against the annual operating budget.

Primary Operating Budget (Appendix 1)

(Includes Library and winter maintenance, excludes Planning & Design, Engineering, Building Standards and Waterworks)

All figures (actual, budget and variance) reflect the year-to-date July results (January 1 to July 31).

Winter Maintenance

The 2019 actual winter maintenance expenditures at the end of the July totaled \$8.48M against a budget of \$7.52M, resulting in an unfavourable variance of \$0.96M.

Year-End Projection including year-end accounting accruals and other adjustments

Staff are projecting year-end results at 100.1% of the revenue budget and 97.7% of the expenditure budget.

This will result in a net favourable variance of 1.2% to budget.

Projected Year-End Variance	
	Fav./ (Unfav.)
1. Primary operating budget (day-to-day operations)	\$ 5.33 M
2. Year-end accounting accruals and other adjustments	\$ (0.86) M
Total	\$ 4.48 M
3. Winter maintenance unfavourable variance	\$ (1.72) M
Net Surplus	\$ 2.75 M

The main drivers for the projected favourable variance in expenditures include 30 net temporary vacancies, facility and streetlight hydro expenses due to lower than budgeted rates, maintenance and repairs, professional services, office supplies, travel, training, and corporate contingencies. Those are partially offset by unfavourable variances in part-time salaries, fire overtime, advertising and promotion and fuel.

Major contributors to the projected revenue favourability at year-end include higher property tax penalty and interest, parking fines, and cultural venue revenues, offset by unfavourable variances in Recreation mainly due to the shutdown of the Milliken Pool from July to December in 2019.

As discussed through the 2019 budget process and in the Q1 investment income report, the investment income is anticipated to be favourable at year-end due to a higher prime rate which may not be sustainable in future years. Any investment income in excess of the \$11.0M budget will be transferred to reserves. Therefore, the \$2.76M projected favourability has been excluded from the year-end forecast.

The City's year-end accounting accruals and other adjustments include firefighter sick leave, severance and salary continuance, post-retirement benefits, and payroll accruals. The 2019 year-end accounting accruals and other adjustments are projected to be unfavourable by \$0.86M.

Winter Maintenance Operations

Winter maintenance operations is projected to have a year-end unfavourable variance of \$1.72M, using an assumption of 30% unfavourability for the last six weeks of the year based on historical trending.

Planning & Design (Appendix 3)

Actual (\$0.60M) – Budget \$1.29M = Unfavourable variance (\$1.89M)

Year-End Projection:

Planning & Design is projecting a year-end deficit of (\$1.62M) compared to a budgeted surplus of \$2.71M. This will result in a transfer from reserve of \$1.62M. Lower than expected planning fee receipts drive the deficit projection, which is only partially offset

by a projection of favourability in personnel, assuming the continuation of 4 net average vacancies through to year-end.

Engineering (Appendix 4)

Actual (\$0.43M) – Budget \$0.53M = Favourable variance (\$0.96M)

Year-End Projection:

Engineering is expecting the year-to-date deficit to continue down to (\$1.14M) by year-end, compared to a budgeted surplus of \$0.07M. This will result in a transfer from reserve of \$1.14M primarily due to lower volumes of engineering fees than budgeted.

Based on the above year-end projections in Planning, Design and Engineering, the reserve is anticipated to be in a deficit position of (\$2.73M) at year-end (see Appendix 5).

Building Standards (Appendix 6)

Actual (\$2.09M) – Budget (\$1.08M) = Unfavourable variance (\$1.01M)

Year-End Projection:

Staff are projecting a year-end deficit of (\$2.26M) compared to a budgeted deficit of \$1.38M. This will result in a transfer from reserve of \$2.26M. The variance is due to lower building permit fees than budgeted.

Based on the above year-end projection in Building Services, the balance of the reserve is anticipated to be \$10.48M at year-end (see Appendix 7).

Waterworks (Appendix 8)

Actual \$7.51M – Budget \$7.59M = Unfavourable variance (\$0.08M)

Year-End Projection:

Waterworks is anticipating to be on budget by year-end.

The Waterworks reserve balance is projected to be \$64.73M at year-end (see Appendix 9).

PURPOSE:

The purpose of this report is to advise Council of the actual year-to-date operating results at July 31, 2019, versus the year-to-date budget.

BACKGROUND:

Council approved the 2019 annual operating budget of \$395.09M on March 19, 2019 which includes the City's primary operating budget (including the Library operating

budget), Planning & Design operating budget, Engineering operating budget, Building Standards operating budget and Waterworks operating budget.

The Planning & Design, Engineering, Building Standards and Waterworks operating budgets are primarily user fee funded, including planning and engineering fees, building permit fees and water billing revenues. Separate reserves have been established to support these departments' day-to-day operations and capital programs.

The year-to-date operating budget is calendared based on available current year information, historical spending patterns and trends and future projections. The intent and focus of this report is to communicate actual performance against the annual plan and to highlight variances.

All budgets are monitored on a monthly basis and departments provide details of material variances (actual to budget). The variances are reviewed, substantiated and summarized by the Financial Planning department.

This report provides variance analyses by:

1. City's primary operating budget by Commission/Department, and
2. City's primary operating budget by major accounts

DISCUSSION:

1. CITY'S PRIMARY OPERATING BUDGET BY COMMISSION/DEPARTMENT

Net results (revenues – expenses) for the seven months ended July 31, 2019 by each Commission and Department, summarized by personnel expenditures, non-personnel expenditures and revenues, are provided in Appendices 7 to 12.

Other expenditures YTD budget of \$2.20M includes contingency expense and non-personnel ramp ups \$1.09M and property tax adjustments \$0.63M. Year-to-date variance of \$0.83M is mainly due to lower corporate contingency expenditures of \$0.66M

3. YEAR-END PROJECTION INCLUDING YEAR-END ACCOUNTING ACCRUALS AND OTHER ADJUSTMENTS

Projected Year-End Variance	
	Fav./Unfav.)
1. Primary operating budget (day-to-day operations)	\$ 5.33 M
2. Year-end accounting accruals and other adjustments	\$ (0.86) M
Total	\$ 4.48 M
3. Winter maintenance unfavourable variance	\$ (1.72) M
Net Surplus	\$ 2.75 M

Staff are projecting a \$2.75M favourable variance to budget at year-end (including winter maintenance), 1.2% of the total year budget.

The net favourable surplus of \$2.75M is to be transferred to reserves as follows in the order as outlined below:

- a. Corporate Rate Stabilization Reserve to achieve a balance equal to 15% of the local tax levy as per City policy;
- b. Remaining surplus, if any, to the Life Cycle Replacement and Capital Reserve Fund.

There are several one-time items affecting the City's 2019 year-end projection of \$4.48M. These items are either one-time revenues or expenses incurred or expected in 2019. In some cases, budgets will be adjusted in the 2020 budget where needed. They have been summarized below:

- \$2.43M favourable in corporate contingency (Budget \$2.56M, 1.1% of the City's Operating Budget of \$233.04M)
- \$1.14M favourable in personnel expenditures primarily due to temporary net vacancies (average 30 net temporary vacancies out of the total tax funded full-time complement of 891, or 3.4% of the full-time complement)
- \$1.05M favourable in facility and streetlight hydro (2020 budget incremental increase is not required for the projected 2020 rate increase)
- \$0.56M favourable in penalty and interest due to higher than anticipated overdue property tax payments (2020 budget to be adjusted)
- \$0.37M favourable in property taxes due to a property reclassification
- (\$0.25M) unfavourable in supplementary taxes netting a \$0.12M favourable variance
- (\$0.86M) unfavourable variance due to year-end accounting accruals and other adjustments

Total: \$4.44M

Based on the projected year-end variance of \$4.48M (excluding winter maintenance), after adjusting for the above items totaling \$4.44M and the transfer to the Corporate Rate

Stabilization Reserve of approximately \$0.78M in order to maintain it at 15% of the local tax levy, the City's projected surplus (including year-end accounting accruals and other adjustments) will be depleted.

Winter Maintenance

Winter maintenance operations is projected to have a year-end unfavourable variance of \$1.72M, using an assumption of 30% unfavourability for the last six weeks of the year based on historical trending.

The City's winter maintenance budget includes personnel expenditures, salt and sand purchases as well as five service contracts:

1. Supply and operation of tandem/single combination plow to sand and plow the City's primary road network;
2. Supply and operation of loaders to assist in the snow removal in cul-de-sacs, wide corners and rear lanes;
3. Grader rentals to remove snow on the City's local road networks;
4. Sidewalk snow removal; and
5. Windrow snow clearing services for eligible applicants

Planning & Design (Appendix 3)

Actual (\$0.60M) – Budget \$1.29M = Unfavourable variance (\$1.89M)

At the end of July, the Planning department had a deficit of (\$0.60M) against a budgeted surplus of \$1.29M. The unfavourable variance of (\$1.89M) was mainly due to lower than budgeted planning and design fees of (\$2.81M) partially offset by lower personnel costs of \$0.89M from a year-to-date average of eleven temporary net vacancies.

Engineering (Appendix 4)

Actual (\$0.43M) – Budget \$0.53M = Unfavourable variance (\$0.96M)

At the end of July, the Engineering Department had a deficit of (\$0.43M) against a budgeted surplus of \$0.53M. The unfavourable variance of (\$0.96M) was mainly due to lower than budgeted Engineering fees (\$1.29M) partially offset by lower personnel costs of \$0.26M from a year-to-date average of three temporary net vacancies.

Building Standards (Appendix 6)

Actual (\$2.09M) – Budget (\$1.08M) = Unfavourable variance (\$1.01M)

At the end of July, the Building Standards department had a deficit of (\$2.09M) against a budgeted deficit of (\$1.08M). The unfavourable variance of (\$1.01M) was mainly due to lower building permit fees than budgeted of (\$1.27M) partially offset by lower personnel costs of \$0.18M from a year-to-date average of three temporary net vacancies.

Waterworks (Appendix 8)

Actual \$7.51M – Budget \$7.59M = Unfavourable variance (\$0.08M)

At the end of July, the Waterworks department had a surplus of \$7.51M against a budgeted surplus of \$7.59M. The main drivers for the unfavourable variance of (\$0.08M) were as follows:

- Lower than budgeted sale of water (\$0.90M) is offset partially by lower purchase of water \$0.68M, resulting in net sales and purchase of (\$0.22M). Year-to-date June average actual non-revenue water (NRW) was 11.7% (NRW budgeted at 11%).
- Lower revenues resulting in an unfavourable variance of (\$0.13M) due primarily to lower water meter installation fees and developer fees for services
- Lower non-personnel costs resulting in a favourable variance of \$0.28M due to lower water, sewer and roadwork materials and supplies costs.
