- -This is currently zoned for single- and semi-detached homes. This is too great an increase in density.
- The complex will connect to a single lane road, Mill St. A potential 34 extra vehicles is too great a load for this location, in addition to the increased likelihood of causing traffic backups and accidents on Main St. South.
- The height of the retaining wall and loss of mature trees on the site will detract from the current attractiveness and ecological value of this recently redesigned section of Main St.
