

## MEMORANDUM

To: Mayor and Members of Council

From: Morgan Jones, Director of Operations

Date: November 11, 2020

Re: **Toogood Pond Geese Fencing**

---

This memo has been prepared in response to the request made at the November 10th, 2020 Budget Committee meeting. The purpose is to:

1. Update Council on the status of the Toogood Pond Shoreline Geese Fencing and Planting;

### **Update:**

1. Operations Parks, Horticulture and Forestry staff advise they are connecting with Toronto Region Conservation Authority requesting permission to install the fence portions beginning December 2020. This type of work is typically completed over winter months by in house resources. Further, shoreline planting enhancements will take place in May 2021 once species are approved by TRCA as well. Once the plantings become established these modifications will be similar to those completed on the west side of Toogood Pond.
