Dear all,

With all due respect, the notice provided was not delivered with a lot of respect to the community or the residents in the neighborhood.

If it wasn't for this email that I only received Friday and the call from Councillor Isa also on Friday, I would have never been aware of this meeting.

This is a much older neighborhood and they are dependent on receiving these notices through the mail. We are doubtful the community has had a chance to be notified with sufficient notice or the opportunity to review all the materials.

The community should not be penalized because the notice was not sent out with taking into account the long weekend or the staff's workload as described in Melissa's email below.

In addition to no written notice being received, the meeting is scheduled for a time when most people have to work.

We ask that you please respectfully schedule a meeting the following week or later in May so at least the community has had a chance to receive it in the mail and the time to review the materials. As of today, we still have not received it in the mail.

We believe this request is reasonable and fair.

Kind regards,
Melody
