Subject: meeting regarding the proposed 14th Avenue Build

Dear Sir,

Regarding the March 18 Development Services Committee Meeting: I have already written you a brief note before the first Markham Council meeting regarding this proposed project. I am secretary for the MICA Board and this proposal concerns me greatly. I am strongly in favour of it since affordable housing is very much needed in Markham. I understand the objections from the group that is in opposition to this plan. "Not in my backyard" – is a common concern. Land is in short supply in Markham and this build would house many families. The building that concerns us most is the one that provides affordable housing for singles, families and seniors. I hope that council takes their needs into account when making a final decision. Yes, I understand that housing density is an issue as well as traffic control. However, if the project is approved, I am sure that the City of Markham will have plans in place to address the issues arising from increased population.

Thanks for your attention,
Barbara Ribble
