Subject: Tonight's Council Meeting-Storm Water Management Funding

Dear Mayor Scarpitti and Council members,

The Unionville Ratepayers Association recently passed a motion pertaining to Storm Water management and how our association and its members wish to see the required upgrades to the necessary infrastructure funded.

I have attached the motion for your perusal. It should be noted that this motion passed unanimously. The Unionville Ratepayers Association strongly urges Markham Council to take this motion into consideration when making a decision on Storm Water Management funding.

Jeff Morris
President
Unionville Ratepayers Association

Motion

1. The Unionville Ratepayers Association believes that the cost of flood control upgrades in Thornhill and other parts of Markham should be borne by the City of Markham through a revenue mechanism which shares costs among all Markham residents and businesses.
2. The Unionville Ratepayers Association believes that up-to-date flood control infrastructure is a core service that benefits all residents of Markham, regardless of where in Markham they live and that it should be provided to all residents of Markham and financed in the same way as all other core infrastructure, such as roads.
