This proposed cell phone tower is less than a kilometre away from my home. I do not want a tower so close to my house. I do not care if I have poor cell reception if it means that I do not have to have a cell phone tower literally in my backyard. I chose this area because of how far the cell phone towers were and I understand you checked all of your safety regulations. I ask you to move the tower further away from my home as I do want to have adverse health affects from the cell phone tower. This proposal is not my liking and I stand against the proposal. I drive by that tower every morning and I suffer from mild headaches already so I do not want more trouble in my area, please i ask of you to reposition the tower further away.

Thank you

As a resident of a household that was notified of the pending cell phone tower for WIND Mobile, I oppose the cell phone tower and do not want it in close proximity to my house. I am only affected negatively by the cell phone tower, as I am not a customer of WIND Mobile. I do not want the cell phone tower near my house. I am concerned of the health issues that could occur with this new cell phone tower. Do not simply send me a file claiming that there are no adverse effects of this cell phone tower. Please consider the opinions of residences. I do not want this cell phone tower to continue.

Thank You

Hello, I am an owner of tow households in the area which was notified of this new cellphone tower. I object to the building of this cellphone tower because we do not know of the adverse health effects of the tower. The cellphone tower can create dangerous radiation that I do not want near my house. I know that cell service is quite poor in my area however I am fine to deal with that if it means I do not have to have an unsightly tower producing hazardous radiation literally 400 metres from my home. Please consider the feelings of the residences.

Dear Sirs,

We are: NASRALLA EZZATELTHANY & BOTROS AMANY

We thank you very much for informing us about the Proposal for a Monopole Telecommunication Tower (50.0m) which will belong to "Wind Mobile".

We are fully supporting the construction of the new tower in the proposed location as this will improve the service provided by the company and will help the community to have better service which will be positively reflected on the community members. We are sure that all the involved parties in the construction of the new tower will follow all the rules and regulations as per the Canadian codes and will comply with them.

Wish you all the success.

Best Regards,

Ezzat & Amany
