

Markham GO Station

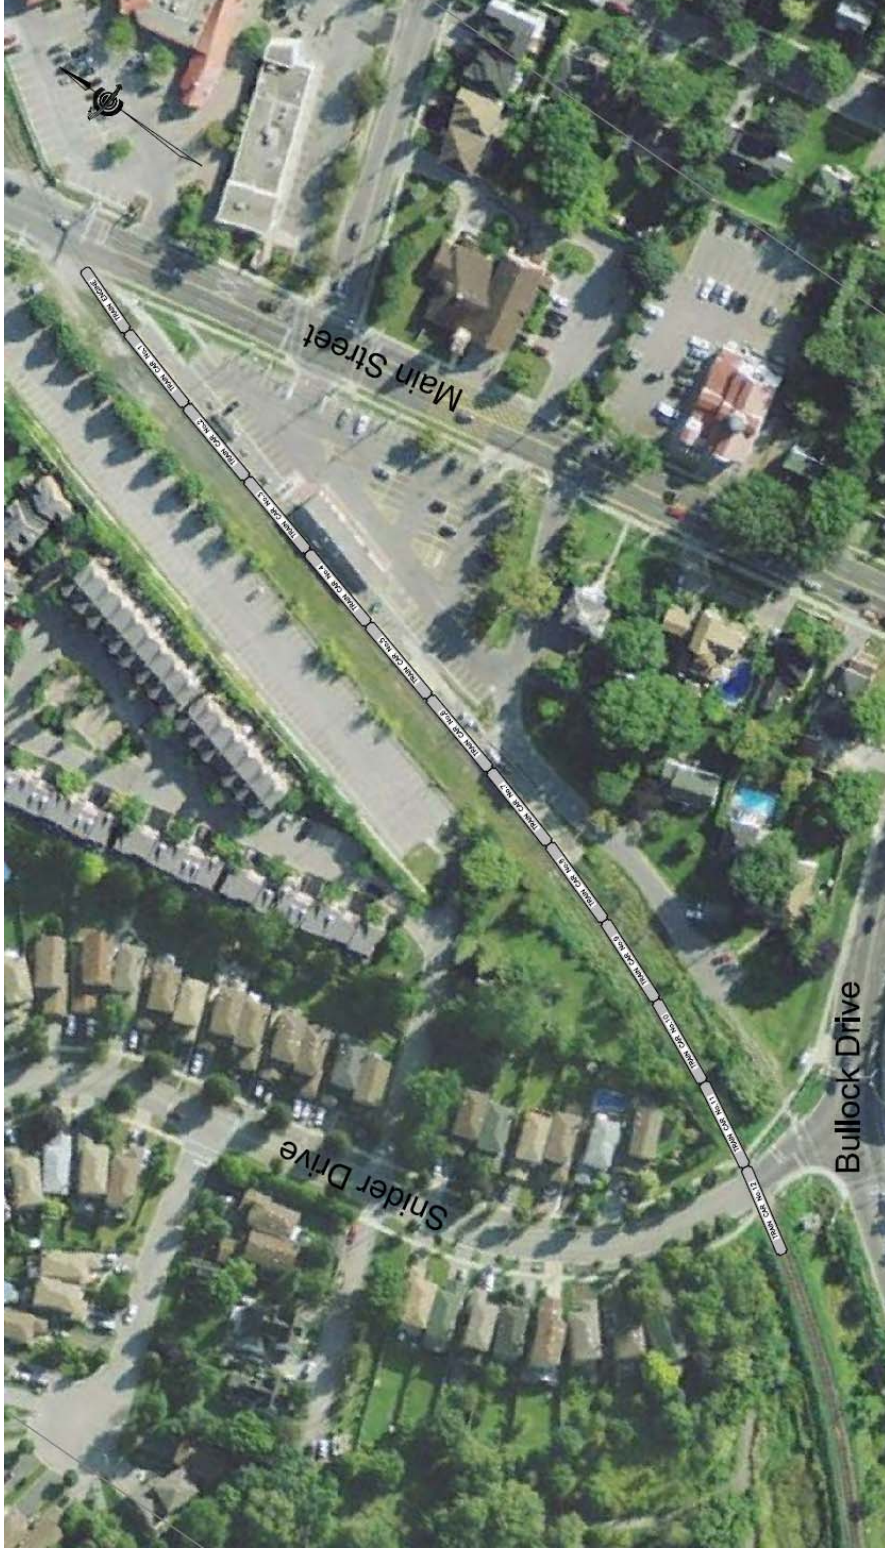

West Platform Construction Project

Overview

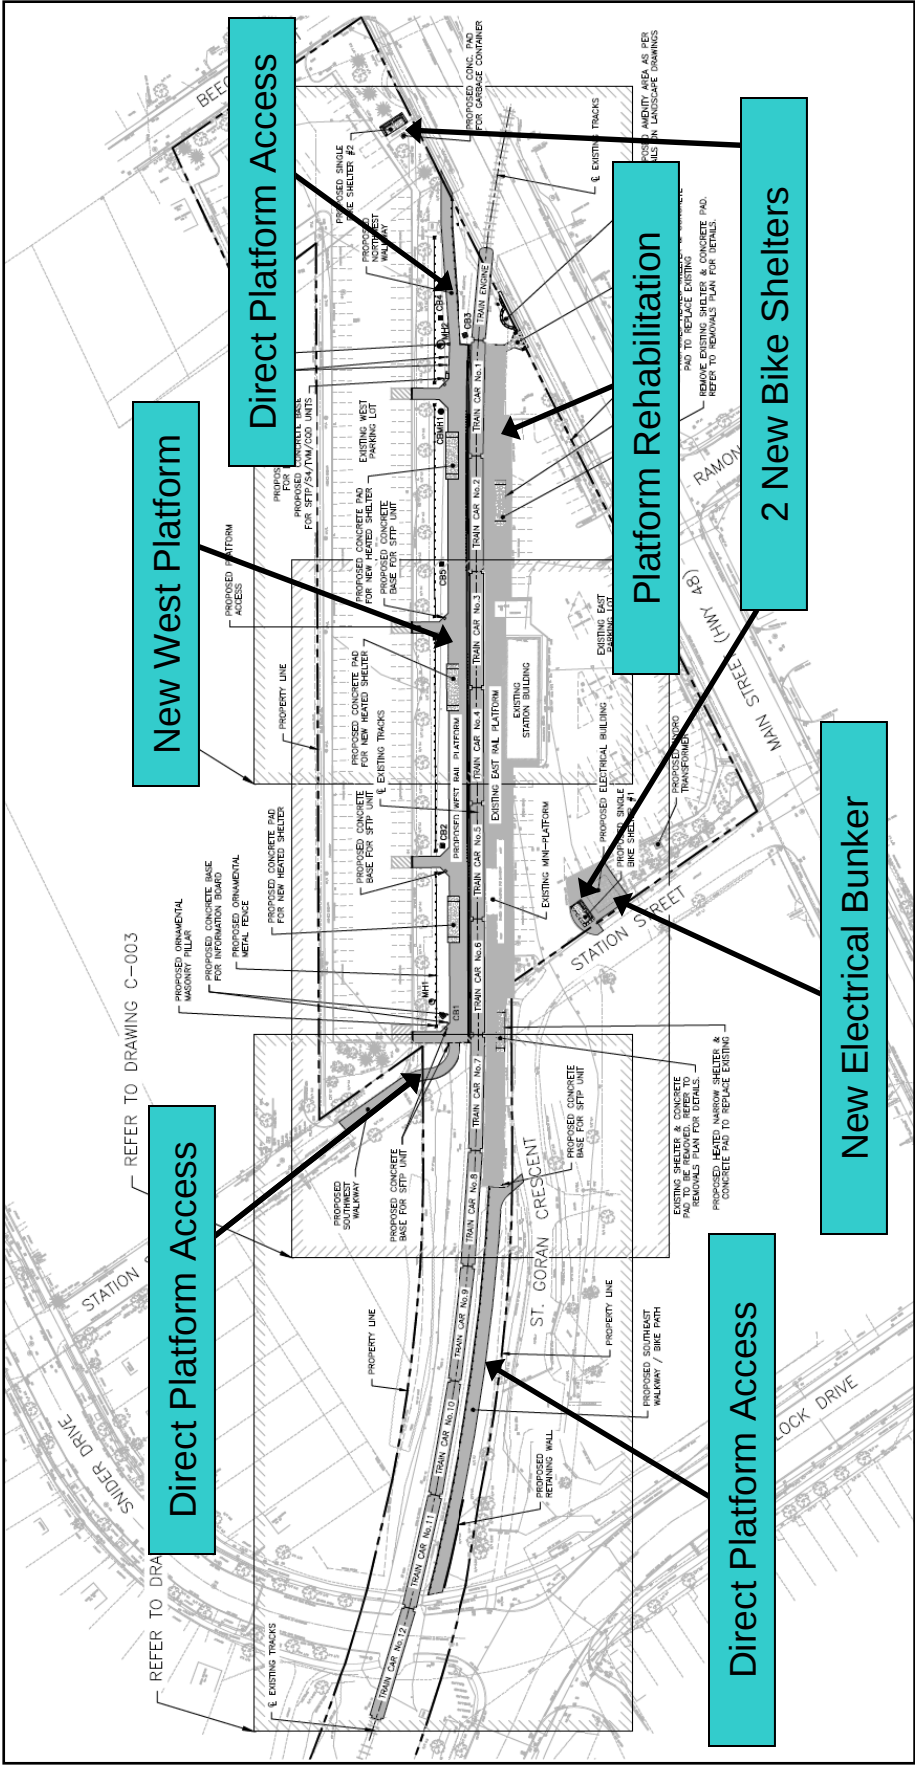

- Markham GO Station (existing conditions)
- Station Improvements and New West Platform
- Electrical Bunker
- Landscaping Improvements
- West Parking Lot Lighting Improvements

Markham GO Station

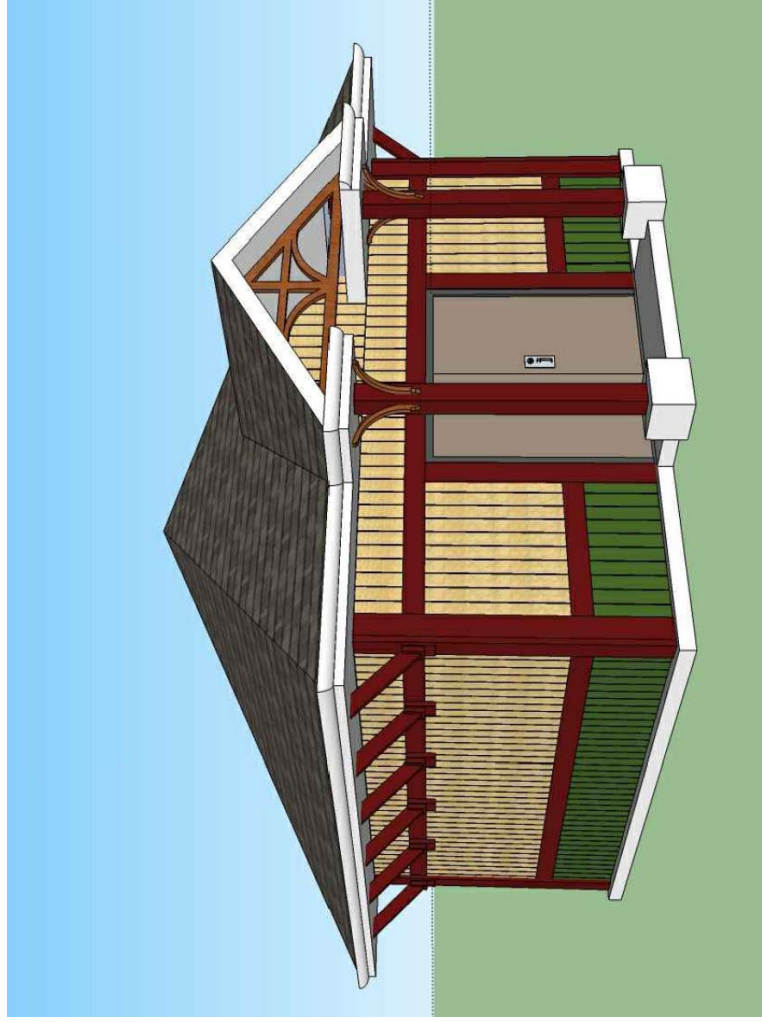

- Current platform is 6 train cars in length which creates an extended dwell time while patrons board the train.
- GO Train blocks Snider Drive and Main Street causing EMS/Fire Safety Issues
- New west platform will reduce dwell time by providing increased platform access and allow boarding from both sides of train

Station Improvements

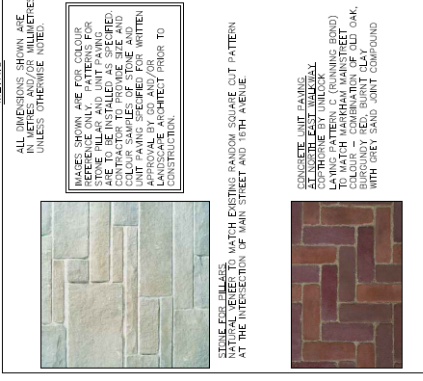

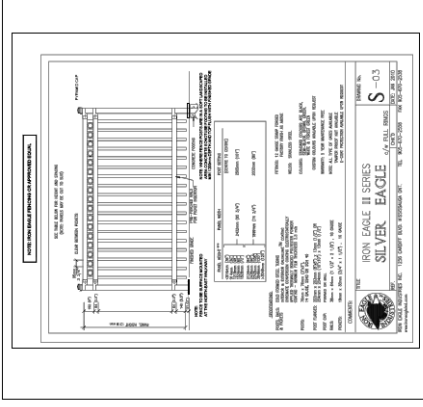

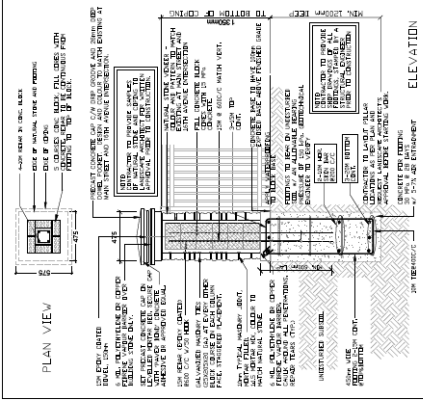

Electrical Bunker

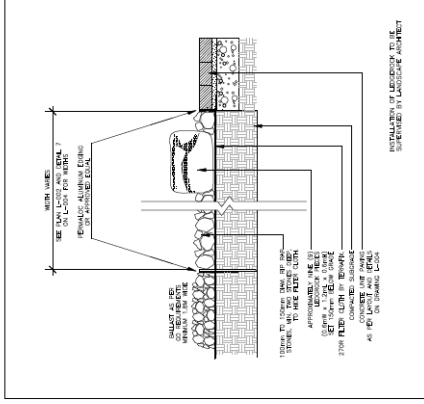

- Electrical building facade mirrors Markham Station building
- Reviewed and approved by City of Markham Heritage Planning Department

Landscaping Improvements

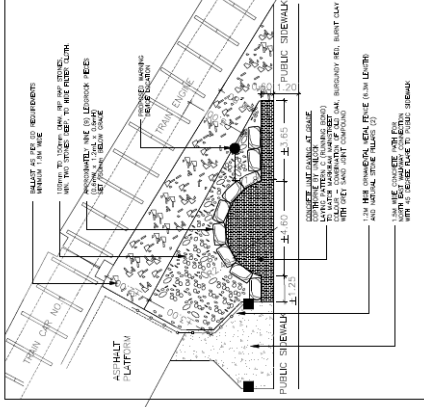

- Reviewed and approved by City of Markham Heritage Planning Dept.
- Matches current streetscape improvements

2 Natural Stone Pillar

3 1.2M High Ornamental Metal Fence

4 Colour Samples for Hardscape Material

West Parking Lot Lighting Improvements

- Lighting upgrades at back of west parking lot include:
 - LED Lights
 - Longer Lighting Arms
 - Lighting Shields
- Upgrade will minimize residual lighting into residential yards.

Thank you
