## Premier eyes Rouge Valley provincial park

By STANLEY GREENE  
Toronto Star Staff Writer

Premier David Peterson is making good on his promise to turn the Rouge Valley into a provincial park.

Peterson has appointed a task force to look at ways of protecting the valley. The task force will report back to the premier by June 1. The valley is the southern part of the Rouge River basin, which flows into Lake Ontario. It is a mix of urban and rural areas, including Mississauga, Etobicoke, North York, and parts of Toronto.

The task force is made up of environmentalists, business leaders, and politicians from both sides of the political aisle. It includes former Ontario premier Mike Harris, former Ontario environment minister John Baird, and former Ontario energy minister Jim Watson. The task force will also include former Ontario premier Mike Harris, former Ontario environment minister John Baird, and former Ontario energy minister Jim Watson.

"The task force is another step forward in our commitment to protect the Rouge Valley," said Peterson. "We are looking at ways to ensure that the valley remains a healthy place for all to enjoy. We are also looking at ways to protect the valley's natural resources, such as water, soil, and air."

The task force will also look at ways to protect the valley's cultural heritage, such as the Indigenous communities that have lived there for centuries. The task force will also look at ways to protect the valley's cultural heritage, such as the Indigenous communities that have lived there for centuries.

"The task force will also look at ways to protect the valley's cultural heritage, such as the Indigenous communities that have lived there for centuries. The task force will also look at ways to protect the valley's cultural heritage, such as the Indigenous communities that have lived there for centuries.

**Broadbent pushes for park use in Rouge**

## Rouge must be preserved says environment minister

By MICHAEL BROADBENT  
Star Columnist

Environment Minister Lazarus Longstaff has announced his department will preserve the Rouge Valley as a provincial park. He said the government will work with local First Nations and other partners to develop a plan to protect the valley's natural resources and biodiversity.

"The Rouge Valley is a unique and important natural area that deserves protection," said Longstaff. "We will work with First Nations and other partners to develop a plan to protect the valley's natural resources and biodiversity."

## NATURE

# Rouge will be largest urban park in the world

By Valerie Miller  
Valley View, 901

"That is our gift to future generations." Canada's largest city lacks the curb appeal of, say, the Rocky Mountains or Great Smoky's whale corridor. But the Big Smoke offers two valuable assets that have prompted the federal government to invest perhaps as much as \$800 million over the next few years: Rouge Park and a mammoth metropolis from which to recruit new nature lovers.

The east-end valley, which straddles the Toronto-Pickering border, is expected to be the world's largest urban park at 6,000 hectares, 15 times larger than Central Park in New York City. At its widest, its 4 kilometers across.

The 28-kilometre ribbon of forest, wetlands, wildlife and a few waterheads connects Lake Ontario to the Oak Ridges Moraine and is within an hour's drive of 7 million residents — many of whom aren't visiting national parks.

Since 2006-2007, attendance at all Parks Canada wildlife, marine and historic attractions has fallen 7 per cent. All Ontario French and Quebec sites, the drop is 12 per cent.

Parks Canada spokesperson Catherine Grenier describes the Rouge as a "game way to connect the entire network" of wilderness, marine and historic attractions. "The big bite element to us is it's an accessible opportunity for close to 20 per cent of Canada's population," says Grenier, who adds that most entire will likely

stakeholders that include municipalities and the province.

Wells says studies show there's "probably a need for about \$40 (million) or \$50 million of capital costs to build the trails, facilities and maintain the park" over the next decade to upgrade it to Parks Canada standards. De Baeremaeker says an additional \$50 million is needed to acquire certain land parcels, some of them privately owned.

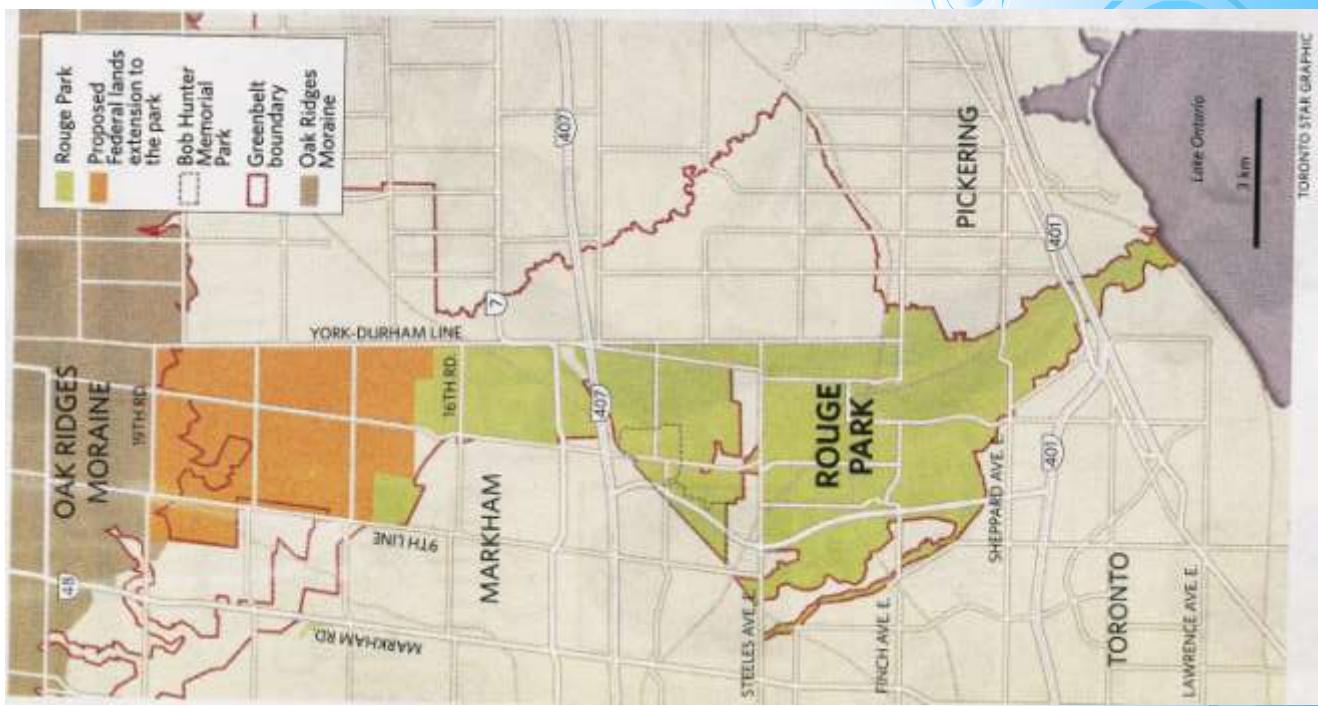

That money will come, assure park supporters such as former Toronto mayor David Crombie, who marvels that the green space has remained intact long enough to earn permanent federal financial and legislative protections. Plundered by 19th-century shipbuilders, trampled by cottagers flooded by a killer hurricane, threatened by subdivision, criss-crossed by highways, pipelines, hydro lines and roads, the Rouge, somehow, has survived.

**THE THICK REDDISH** clay on the river banks tinted the water rushing southward to the region's great, deep lake. And so early French explorers traversing the glacier-carved valley dubbed the wide channel the Rouge River.

The Rouge includes the region's best remaining coastal wetlands, swatches of rare ancient Carolinian forest, bobolinks, Blanding turtles and other species at risk, a 36-metre cliff, two national historic sites, working farmland, the Toronto Zoo, campgrounds and millenia of aboriginal history and culture.

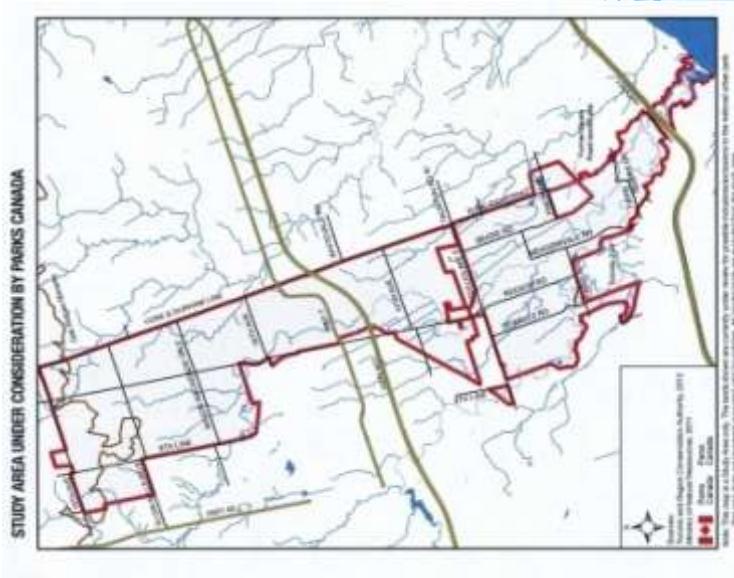

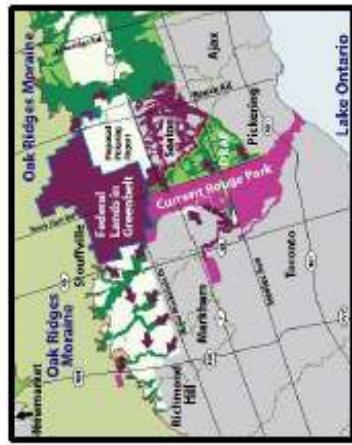

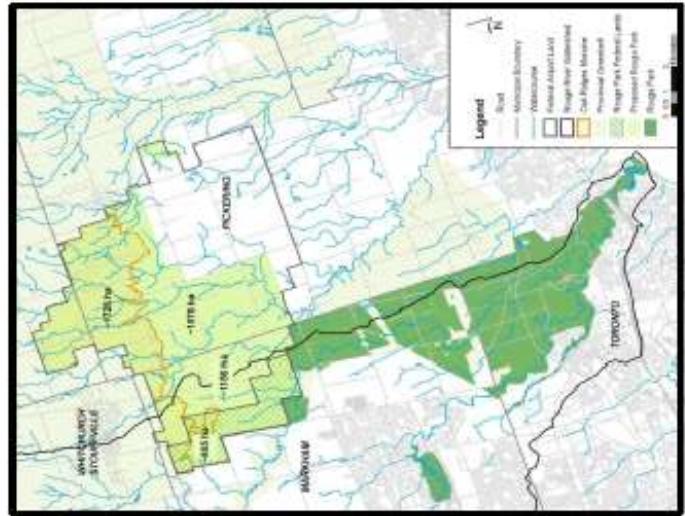

Rouge Park, shown in photos taken this month and, right, in May. Features rare Carolinian forest, such as risk species as bobolinks and Blanding turtles, the Toronto Zoo and millenia of aboriginal history and culture.

# **3051+ ha Federal Green Space Preserve Announced by Transport Minister in 2001/02 Linking Rouge and Duffins Watersheds with ORM**

**Unfortunately, most of this federal “Green Space Preserve” is not included in the current Rouge National Park Study area**

# A $100 \text{ km}^2$ Rouge National Park Study Area is possible by including Federal Greenbelt lands in Pickering

Stouffville extends to the Townline Road (below photo)  
– the federal “Green Space Preserve” lands in Pickering (east of Townline Rd below) are needed to complete the Lake to Moraine “Rouge National Park” Link

# Adopt Existing Rouge Park Vision

- The approved 1994 and 2011 Rouge Park Management Plan Vision states:

*The Rouge Park will be a special place of outstanding natural features and diverse cultural heritage in an urban-rural setting, protected and flourishing as an ecosystem in perpetuity. Human activities will exist in harmony with the natural values of the park. The park will be a sanctuary for nature and the human spirit. The primary focus of the vision centres on the protection and appreciation of the park ecosystem.*

- **Recommendation:** This existing, long-standing Rouge Park vision captures the public, agency and stakeholder comments received in multi-year planning processes over the last 22 years. This excellent vision should be adopted within the concept, legislation and strategic plan for Rouge National Park.

# Park Purpose and Priority

- **Recommendation:** The Rouge National Park concept, legislation and strategic plan should give priority to the protection and restoration of a large mixed woodland plain and Carolinian forest system which protects and restores biological diversity, ecological health, water quality and stream flow and links Lake Ontario to the Oak Ridges Moraine with natural environment parklands, public trails and healthy local food production plots.

# Rouge National Park

## “Wild in the City”

- Rouge National Park is a nationally significant ecological area which should not, in our view, be mislabelled as an “Urban Park” or “People Park” as currently proposed in the draft park concept.
- **Recommendation:** “Rouge National Park” is the most appropriate name, along with the long-standing motto “Wild in the City”. This title reflects the park’s nationally important habitat and natural environment, its near-urban setting and its “national” standard of management by Parks Canada to ensure the “protection and appreciation of the park ecosystem”.

**We respectfully ask the Minister of Environment Peter Kent and Prime Minister Stephen Harper to:**

1. Create a 100 km<sup>2</sup> Rouge National Park Study Area
2. Respect, strengthen and implement the Provincial Greenbelt Plan, Rouge Park Plans, Rouge Watershed Plans and the Rouge Natural Heritage Action Plan;
3. Give priority to the protection and restoration of the Little Rouge ecological corridor to link L. Ontario to the Oak Ridges Moraine with Carolinian & mixed wood forests;

# **2010 Quote from Hon. Tom McMillan Canada's Minister of the Environment (1985-1988)**

**"I view "The Rouge" as one of the most important things we did as a government, not only in the natural heritage field but in our whole public policy agenda. Now, the work to protect the Rouge, and to make its splendours accessible both to Canadians and to all humanity, must find its logical completion through full national park status for this incomparable place. Nothing less will do justice to the natural heritage values so important to our national identity."**
