

# The Corporation of the City of Markham Annual Water Quality Report

Covering the period from January 1, 2015 to December 31, 2015

In compliance with

The Ministry of the Environment and Climate Change (MOECC)

Ontario Drinking Water Systems Regulation 170/03

### CITY OF MARKHAM WATER SAMPLING PROGRAM

January 1 to December 31, 2015

To comply with the Ontario Drinking Water System Regulation, Markham collects and tests water samples throughout its distribution system at a total of 106 locations. The 106 sample locations are strategically selected and evenly distributed to ensure Markham gets the best representation of the water distribution system. The need for additional locations is reviewed annually & in 2015, no additional locations were warranted. Sampling is rotated through the 106 locations and the drinking water is tested for Chlorine residual, Bacteria, Trihalomethanes, Nitrites & Nitrates, Lead, Organics & Inorganics in compliance with Ontario Regulation 170/03. The samples are collected by licensed Waterworks operators and analyzed by the provincially approved York-Durham Regional Environmental Laboratory.

Waterworks follows rigorous testing and compliance procedures. The City reports any adverse sampling results that occur to the York Region Medical Officer of Health and to the Ministry of Environment and Climate Change (MOECC) and immediately undertakes the necessary corrective action. Re-samples are taken following the corrective action(s) and tested until two consecutive samples are within acceptable parameters.

#### **Summary of the sampling for 2015 follows:**

#### **Sampling Program:**

Total Number of Samples collected and tested in 2015 = 5,975

#### **Adverse Test Results:**

Total Number of Adverse Water Quality Incidents (AWQI) = 6

#### **Breakdown of Adverse Results:**

Total adverse due to Microbiology Exceedances = 6

The drinking water distributed to the City of Markham residents in 2015 was safe to drink and met all drinking water requirements. During the operation of the water distribution system during 2015, there were very few adverse sample incidents (0.10% of all system tests undertaken) and when these occurred, they were immediately resolved. The drinking water system is maintained by Waterworks with continual improvements and programs in place to ensure water of the highest quality.

#### **Describe your Drinking-Water System**

The City of Markham's distribution system is an extension of the Toronto and York Region distribution systems. Raw surface water from Lake Ontario is disinfected, treated and tested rigorously by the City of Toronto and Peel Region for microbiological, organic and inorganic parameters prior to reaching the York Region distribution system. Markham is supplied with treated water via feeder mains from Toronto and Peel Region. York Region distribution system acts as a wholesale supplier of water and provides further testing, storage and pressure boosting for the Markham system.

Markham's Distribution System provides treated water to approximately 350,000 residents and is comprised of approximately 1,500 kilometers of various size watermains, 10,800 watermain valves and 8,551 municipal fire hydrants. Markham is a distribution only system, without pumping and storage facilities. Markham's drinking water within the distribution system is tested for standard parameters, in compliance with Ontario Regulation 170/03. The samples are collected by licensed Waterworks operators and analyzed by the provincially approved York-Durham Regional Environmental Laboratory.

#### List all water treatment chemicals used over this reporting period

Not applicable; treatment chemicals are introduced at various sources by the City of Toronto, Peel Region and York Region only.

#### Were any significant expenses incurred to?

- [x] Install required equipment
- [x] Repair required equipment
- [x] Replace required equipment

#### Please provide a brief description and a breakdown of monetary expenses incurred

Cathodic Protection of Iron Watermains	= \$413,100
Water Meter Replacement/Upgrades	= \$545,700
Watermain Replacement	= \$1,591,700
Watermain Replacement Design for 2015	= \$139,600
