# Unionville Washrooms & Welcome Centre

# Objectives

- This is the culmination of a 2 year study on the best alternatives for the construction of the Main St. Unionville washrooms and Welcome Centre.
- The 3 best options are being outlined in this presentation with a conclusion regarding which options staff recommends to be presented at a public meeting.

# **3 Options**

- Locate Washrooms & Welcome Centre in the historic Unionville train station parking lot.
- Locate the Washrooms and Welcome Centre at the site of the existing Recycling Depot. The Recycling Depot will be relocated to 8100 Warden Ave. This location may be temporary.
- Locate the Washrooms and Welcome Centre at the site of existing Recycling Depot. A New depot will be built at South Unionville Main St.

### Option 1

Construct Washrooms and Welcome Centre at the Unionville Train Station Site

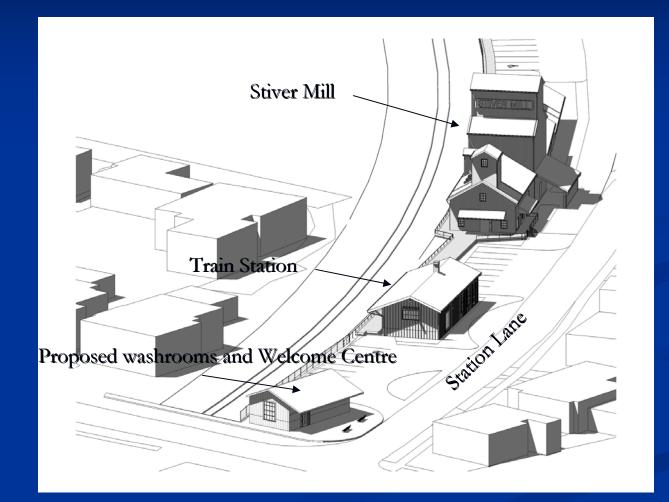

#### <u>Advantages</u>

- Lowest cost alternative
  Total Cost: \$250,000
- Recycling Depot can remain in its present location

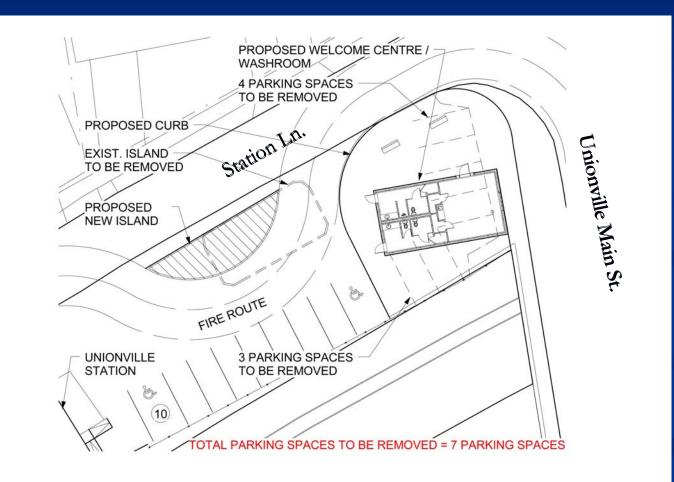

#### <u>Disadvantages</u>

- 7 parking spaces will be lost in the train station parking lot
- This option does not allow for a permanent attendant at the Welcome Centre as a crash barrier would then be required

### **Train Station Site**

### **Train Station Site**

# Option 2

Recycling Depot relocated to 8100 Warden. New Washroom & Welcome Centre to be constructed at the existing Recycling Depot site.

#### Advantages

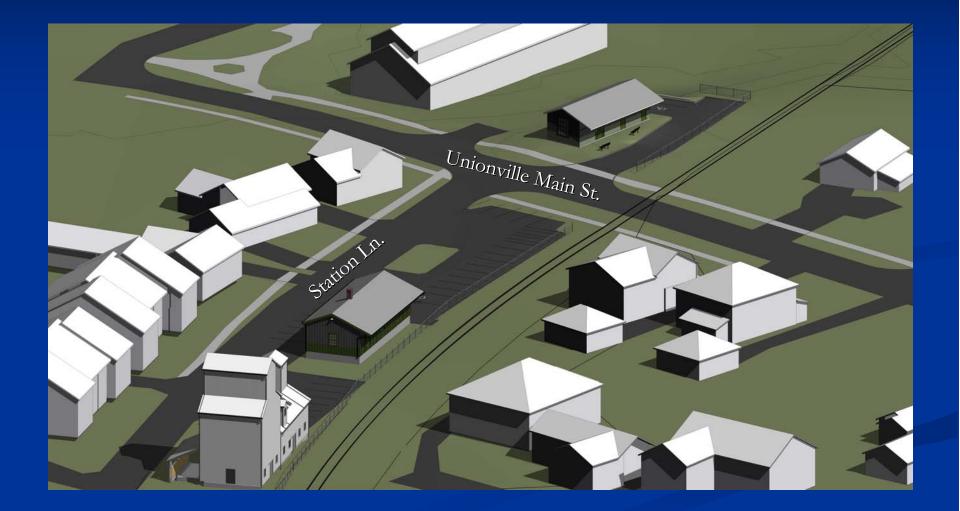

- There is a very low set up cost for the new recycling depot
- The aesthetic look of the site in Unionville will be greatly improved

Total Cost: \$400,000

#### **Disadvantages**

- The 8100 Warden location for the depot may be a temporary solution.
- There may be opposition from the Unionville residents re: the distance to the new recycling depot
- This option does not allow for a permanent attendant at the Welcome Centre as a crash barrier would then be required.

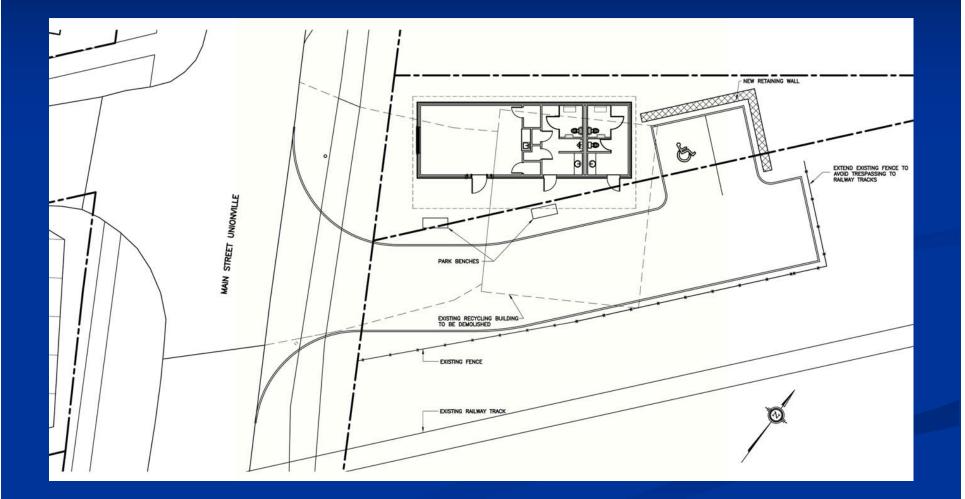

## **Overall Unionville Site Plan**

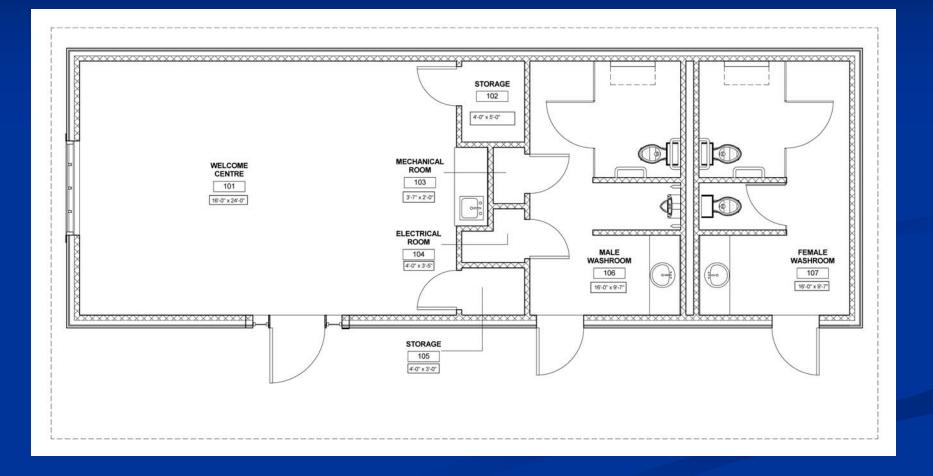

### New Washroom and Welcome Centre at the existing Recycling Depot Site

### Washrooms and Welcome Centre at Existing Recycling Depot Site

### Floor Plan – Washrooms and Welcome Centre at Existing Recycling Depot Site

# Option 3A

Recycling Depot relocated to South Main St. Unionville. Washroom and Welcome Centre to be built on existing Recycling Depot site

#### <u>Advantage</u>

- The aesthetic look of the Recycling Depot site will be greatly improved
- The Unionville residents will not be overly inconvenienced by the distance to the new depot

#### Total Cost: \$850,000

#### <u>Disadvantages</u>

- This is the highest cost alternative
- The Town Planning Dept. advises that this location is highly visible and would not be appropriate as a permanent 'gateway' feature.
- This option does not allow for a permanent attendant at the Welcome Centre as a crash barrier would then be required.

### Option 3B

Recycling Depot relocated to South Main St. Unionville. Washroom and Welcome Centre to be built on existing Recycling Depot site

#### <u>Advantage</u>

- The aesthetic look of the Recycling Depot site will be greatly improved
- The Unionville residents will not be overly inconvenienced by the distance to the new depot

Total Cost: \$550,000

#### <u>Disadvantages</u>

- This option is a temporary location: 5 7 years max.
- This option does not allow for a permanent attendant at the Welcome Centre as a crash barrier would then be required.

## Recycling Depot – S. Main St. Unionville Site

# Option 3B

#### Recycling Depot at South Main St. Unionville as a New Cover - All Structure

#### Re-cycling Structure – 1,500 sq.ft.

- A new pre-fabricated Cover all Structure complete with a precast foundation, concrete slab & 4 automatic overhead doors
- Chain-link fence
- Rental washroom

#### Site Work

 Heavy duty asphalt/concrete paving for vehicle access by the public and trucks to remove the materials.

#### **Project Budget**

\$150,000 for the recycling depot
 **Total Cost:** \$550,000

# New Cover – All Recycling Depot at S. Main St. Unionville – Option 3B

#### **Cost** Comparison

Description	Overall Cost	Additional Funding Required *
Option 1 Train Station Parking Lot	\$250,000	\$100,000
Option 2 Recycling Depot relocated to 8100 Warden Ave.	\$400,000	\$250,000
Option 3A Recycling Depot relocated to S. Main St. Unionville	\$850,000	\$700,000
Option 3B Recycling Depot relocated to S. Main St. Unionville (Cover - All building)	\$550,000	\$400,000

\* In addition to the funding remaining in the 2009 approved Capital Project #9219 which has approximately \$150,000 remaining

### Recommendation

- Town staff recommends that Options 1, 2 and 3B be presented to the Unionville residents at a public meeting
- Staff recommends not to present option 3A at future public meetings due to its high cost
