

Markham Council:

12/15/2006

Community of Dickson Hill and Mill Race Court

Please find attached signed documents in regards to a request to the town of Markham (region of York if required), to undertake a feasibility study for municipal water services to our neighborhood. (Community of Dickson Hill and Mill Race Court)

This is a very significant issue for our community and as you can see by the documentation has plenty of support. I have personally spoke with most of my neighbors and they agree that our community should be looked at and treated exactly like others in the town who have been down this very same road. (Box Grove /Cachet Court).

With development now virtually unavoidable the location of municipal water service will be here in the not so distant future, and virtually on our doorstep (see attached documents). With this the afore mentioned "feasibility study" for municipal water service delivery, is in direct relation to our communities ongoing problems and challenges with our private wells/water supply issues which the regions development has caused. Other communities have had their municipal water connection/delivery "heavily subsidized" by the town and/or region of York. We would ask (and should demand realistically), that our community be treated equally in this regard.

We look forward to this feasibility study being approved and proceeding as quickly as possible, ultimately this being the first step towards municipal water delivery to our community.

Respectfully

Terry Churchill

43 Dickson Hill Road

Re: Petition to Conduct Feasibility Study for Municipal Water Service on Dickson Hill Road

We, being the owners on Dickson Hill Road, request the Town of Markham to undertake a municipal water service feasibility study to service our property.

We understand that the residents will be required to pay the Town for the actual full cost of the feasibility study if the project proceeds to design and construction. We understand that the Town will provide a cost estimate for the work to the residents.

We further understand that the municipal water service by the Town will include providing a connection up to the property line. Connection from the property line to the dwelling will not be included in the Town works or cost provided to the owners. The property owners will need to arrange and pay for connection from the property line to the house at their own expense.

We, being the owners on Dickson Hill Road, request the Town of Markham to undertake a municipal water service feasibility study to service our property.

We understand that the residents will be required to pay the Town for the actual full cost of the feasibility study if the project proceeds to design and construction. We understand that the Town will provide a cost estimate for the work to the residents.

We further understand that the municipal water service by the Town will include providing a connection up to the property line. Connection from the property line to the dwelling will not be included in the Town works or cost provided to the owners. The property owners will need to arrange and pay for connection from the property line to the house at their own expense.
