Mayor Don Cousens
Town of Markham
101 Town Centre Boulevard
Markham, ON L3R 9W3

July 24, 2006

Dear Mayor Cousens:

I am writing this letter to request your support for York Central Hospital Foundation's 19th annual Gala event "Diamonds & Ice" to be held on Friday, November 3rd, 2006. Over the last eighteen years, this event has raised more than \$3 million to help fund new medical technology in virtually every area of York Central Hospital.

York Central Hospital is located in the fastest growing urban region in Canada and we are the only provider of hospital services in Southwest York Region. This means we are already responsible for the health care needs of some 330,000 people. By 2016 this number is predicted to jump to 460,000.

Our goal this year is to raise \$500,000 to help purchase a Digital Mammography machine for the newly designed Women's Health area in York Central Hospital's Diagnostic Imaging Department. Digital Mammography takes an electronic image of the breast and stores the data on a computer where it can be enhanced, magnified or manipulated for further evaluation. This is currently not possible with hard copy films which require extra views and additional radiation.

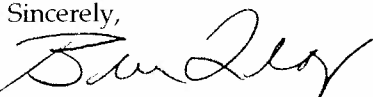

York Central Hospital performs approximately 12,000 mammograms per year and the current wait time is 4 months. A Digital Mammography machine will dramatically reduce this wait. Just as important, a dedicated space for the Digital Mammography will improve the service for our patients by allowing for more privacy in an aesthetically pleasing environment.

This Digital Mammography machine will increase the rate of breast cancer detection in younger women and in women with dense breasts. It will also enable us to perform stereo-tactic biopsies on site, instead of diverting patients to other facilities. Stereo-Tactic biopsies are far less invasive than the type of biopsy we currently perform at York Central Hospital. With this new diagnostic equipment, we will be able to provide doctors with results just a day or two after the biopsy. Early detection is the best defence against death from breast cancer.

Breast cancer is the most frequently diagnosed cancer among Canadian females and the leading cause of cancer-related deaths among women in York Region. In Canada, one in nine women will be diagnosed with breast cancer. In fact, Canada has the second highest incidence of breast cancer in the world.

Your sponsorship of this year's event will help to ensure the evening's success and, most importantly, your patronage will help to improve healthcare for women in our community. Thank you in advance for considering this request.

Sincerely,

William M. Leacy, CFRE
President & CEO
