

General letter.

May 6/06

To Whom it concerns,

You should not promote a rodeo which still has events which are cruel to animals. It nowadays is unnecessary to cause pain, stress, fright, anger and aggression in animals just to entertain the public. Sometimes even apparatus is applied to a bull's private parts on the belt to cause great pain to promote physical reactions. The bull in this photo is not a happy contented animal.

Put yourself in his place.

A rodeo can be a series of events which is entertaining but not harmful to our fellow creatures.

Sincerely, a concerned citizen,
Penny Parmenter
