

By-law 2017-151

A by-law establishing schedules of retention periods
for all records kept by the City of Markham

WHEREAS, Section 254 of the *Municipal Act*, as amended, provides that the Council of a Municipality shall retain and preserve its records in a secure and accessible manner and establish retention periods during which the records must be kept by the Municipality;

Now therefore the Council of The Corporation of the City of Markham hereby enacts as follows:

1. The retention periods for all records as stipulated in the table attached hereto as Schedule A and forming part of this by-law, are hereby adopted.
2. Any of the records set out in Schedule A, may be destroyed after the prescribed retention period for each record has expired.
3. That By-law 2001-101 as amended is hereby repealed.

Read a first, second, and third time and passed on December 12, 2017.

Mayor

CLASSIFICATION STRUCTURE AND RETENTION BY-LAW

OVERVIEW

The records classification and retention structure is a valuable tool to manage the records and information created or received by the City of Markham and as such, it is an important strategic business resource. The systematic application of managing information through a classification structure allows for the control of information assets throughout its lifecycle – from cradle to grave. By consistently identifying information, regardless of where it is held, the structure removes barriers to access (assuming appropriate permissions) while also protecting privacy and allows information to be available in a timely fashion to those who need it. This access is essential for supporting decision-making and sharing the knowledge developed through collaboration efforts. Such a system also supports accountability and good governance, protects personal and confidential information, captures and preserves the corporate memory and the history of the City of Markham while improving organization efficiencies and mitigating risk.

The City of Markham's Classification and Retention By-law is the official policy for the management of records at the City. It provides staff with the authority to manage records in accordance with relevant policies, legislation and regulations. The City of Markham has adopted the International Organization of Standards (ISO 15489) standard of a functionally based classification structure to provide a hierarchical framework for the organization and description of records. The structure is based on the content of the document and applies to all records, regardless of whether they are in paper, digital, image, audio or video format. Each classification category is accompanied by a retention timeframe that reflects applicable legislation and business need. The main reasons for a functional approach are as follows:

- Eliminates duplication of records because all records related to a specific function are grouped together rather than split up among departments. For example, all agreements and contracts would be under the function of LEGAL, LICENSING & PERMITS;
- Provides integrity and thus reliability when searching for information within the central repository because all "like" things are filed together rather than "classified" under different departments;
- Business functions are independent of organizational structure. Changes in organizational structure do not affect the classification scheme. It doesn't have to be "re-invented";
- Department names are forever changing, but functions remain constant;
- Reduces silos of information.

The functions of the City of Markham are as follows:

Administration
Asset Management and Maintenance
Communication, Promotion & External Relations
Employee Management
Environment, Sustainability & Safety
Financial Management

Governance
Information Technology
Legal, Licensing and Permits
Planning, Development and Building
Project Management
Recreation and Cultural Services

DEFINITIONS

RECORD

The International Organization for Standardization (ISO) defines a record as “*recorded information in whatever physical format created, collected or received in the initiation, conduct or completion of an activity which has content, context and structure, is authoritative and reliable and provides evidence of decision-making*”. Records can include books, papers, maps, electronic documents, digital, video, voice recordings, web pages, etc.

TRANSITORY RECORD is useful for only a short time and has minor importance. When its use is over it should be deleted or destroyed. A transitory record can be destroyed at any time before the retention period of the original document as the official or original document is held by the originator/primary area of accountability and subject to the approved retention period. Examples of transitory records include the following:

- personal messages
- general notices and announcements
- copies of documents and emails
- cc, bcc, or FYI emails kept only for convenience
- drafts and working documents to prepare final records with a few exceptions such as agreements/contracts, drafts in developing legislation.

NON-RECORD has no bearing on the organization’s functions, operations, or mandate. A non-record may be a general distribution item, reference book, published legislation from other municipalities or government agencies or extra copy/convenience copy. A non-record is typically used, if ever, only for a very limited period of time. It does not have to be collected and maintained. This document is not required to be retained and therefore does not appear on a records retention by-law.

When applying the retention by-law to the City of Markham records, the above definitions of a record, transitory and non-record, determine what should be classified and focus on core business documents generated by the originator or the primary area of accountability.

However, notwithstanding the above definition of a transitory record, it is recommended that convenience copies and drafts be subject to classification rather than building up and taking up space on the server.

Convenience Copies

- Convenience copies are, by definition, not considered records. However, recent legal actions have drawn attention to the use of convenience copies for purposes of evidence or discovery. Incidents have occurred where primary documents have been destroyed as per established retention by-law but convenience copies still existed in the organization. These copies have been deemed to be official and subject to discovery or legal proceedings. Given these legal implications it is important for the City of Markham, if required, to classify convenience copies and ensure they are tracked and destroyed or disposed of no later than the retention period of the original document.
- Convenience copy holders are encouraged to destroy these copies on a regular basis. Convenience copies can be destroyed at any time before the retention period of the original document as the official or original document is held by the originator/primary area of accountability and subject to the approved retention period. A convenience copy cannot be held longer than the original document’s retention period. Convenience copies cannot be sent to off-site storage. Only the original document from the originator / primary office of accountability identified on the retention by-law will be sent to off-site storage, as applicable, and in accordance with the retention by-law.

DEFINITIONS OF TABLE HEADINGS

RECORD SERIES AND FILING METHODOLOGY

Record series are defined as a group of related records that have the same form and function, are filed as a unit and are maintained together for retention scheduling purposes. Record series are destroyed as a unit when the retention period is up unless there is a litigation or audit hold on the record series. The record series are grouped into broad organizational functions, then by the activities that take place within each function. Activities are created based on the roles and responsibilities of staff who partake within that activity. Within each activity are the records that are created through that activity – it is the evidence of a business transaction – these are the record series where retention is applied. The types of documentation found in each record series are described in what is referred to as a scope note.

ACCOUNTABILITY

This classification scheme identifies the Office of Accountability – the business unit or department who is accountable for ensuring that the official record is managed throughout its lifecycle. This is the business area that has primary interest or ownership of the records. They are considered to be the official holder of the original records. When accountability refers to the “originator” it applies if all departments in the City are involved in creating and saving records for that record series. There is no one department accountable. Everyone is accountable for their own records.

RETENTION

The column labelled “**Total Retention**” specifies the length of time records must be kept. An event such as the termination of an agreement or project close may be used to indicate when the retention calculation begins. Retention periods are reviewed and approved by the Office of Accountability, Legal and Clerk’s authority.

DISPOSITION

The column labelled “**Disposition**” refers to how the records are disposed of at the end of their lifecycle. Once the records have reached the end of their total retention period they may be totally destroyed/expunged, or all or part of the record series may be designated as archival selection or archival which means the entire record series is kept for future generations. Records identified in the classification structure and retention by-law can only be destroyed/disposed of in accordance with the City of Markham’s records destruction procedures and in conjunction with approval from Legal and Clerks. All destroyed records should be documented by a certificate of destruction as proof of final disposition. The certificate of destruction is a permanent document to prove destruction took place, what records were destroyed and when they were destroyed.

SECURITY CLASSIFICATION

In order to protect the confidentiality, integrity and availability of the City of Markham’s data, each record series is assigned a security classification, being public, internal or confidential. *(See legend for definitions –pg.4)*

CITATIONS AND COMMENTS

The Citation/Comments column provides the cross-reference identifier to the legislative citations that are recommended as applicable for each category of records. FED refers to the Federal legislation and ONT refers to Ontario legislation.

LEGEND FOR RETENTION TERMS

Code	Definition	
A	Archival	Record Series which has been assessed to have historic significance. Archival documents are retained for 10 years at which point they are appraised again for historic importance and possibly archived for another 10 years. Every 10 years they are reviewed for historical significance. For electronic records they are reviewed to determine if these will continue to be migrated.
AS	Archival Selection Before Destruction	Refers to reviewing the records series before destruction to see whether they have historic significance prior to destruction. This is different from archival because in the case of an archival designation the entire records series is kept for posterity, whereas, in archival selection before destruction, records are “selected” for potential historic significance. The entire record series is not kept.
CY	Current Year	Refers to January 1 st to December 31 st .
FY	Current Fiscal Year	Refers to January 1 st to December 31 st . NOTE: City of Markham’s fiscal year is the same as the calendar year. However for financial information, most times, the retention is referred to as fiscal year.
D	Destroy	Requires that upon expiration of the retention period the document is destroyed – shredded, recycled, deleted (expunged).
S/O	Superseded or Obsolete	Refers to the replacement of a document once it has been updated or revised. The new document supersedes the previous version.
T/E	Event Trigger for termination or close of an event or activity	Refers to a record being retained until it has been closed or terminated, typically used for case-based or project records where the retention refers to the case being closed or the transaction being completed. For example, this retention applies to an employee file and is triggered at the point at which the employee leaves the organization. These records are usually maintained until the case or transaction or employee record is closed/terminated plus a pre-defined number of years, e.g. T/E+3 means retained until the case is closed plus 3 more years.
PIB	Personal Information Bank	Refers to records of individuals who are identifiable by home address, phone number, SIN#, OHIP#, etc. This information is protected under the MFIPPA legislation.
P	Permanent	Refers to records that are typically covered by legislation such as by-laws, council and statutory committee meetings or retained until the City of Markham ceases to exist as a municipality.

SECURITY CLASSIFICATION LEVELS

Public: This classification applies to information in the public domain. The information is fit for distribution via public channels such as email and websites. Disclosure of *Public* information is not expected to adversely impact the City of Markham, its employees, its stakeholders, its business partners, and/or its customers.

Internal: This classification applies to general information intended or appropriate for any internal audience or a restricted external audience such as stakeholders. Internal access is unrestricted, but external access is based on a business need-to know basis.

Confidential: This classification applies to the most sensitive business information that is intended for a limited audience. Its unauthorized disclosure could seriously and adversely impact the City of Markham, its employees, its stakeholders, its business partners, and/or its customers. Records, which are designated as confidential, are accessible only by a defined sub-group of the City of Markham. Access permissions may be given to staff based on their membership to a specific group or individually as City of Markham management deems appropriate.
